Cloud Data Integration, Application Integration, Cloud Data Quality, Data Governance and Catalog, Mass Ingestion

ON-PREMISES
PowerCenter, Data Quality (IDQ), Enterprise Data Catalog, Axon Data Governance, MDM

PLATFORM
Secure Agents and domains, upgrades, users, roles and access, monitoring and support

WHAT I DELIVER

- **PowerCenter to IDMC migration:** inventory, conversion, retesting and row-level reconciliation, so the business signs off on numbers.
- **Data integration:** mappings, workflows, taskflows and schedules across files, databases, APIs and cloud warehouses; incremental loads that are safe to rerun.
- **Data quality:** profiling, rules, scorecards, cleansing and deduplication in IDQ and Cloud Data Quality, with a reason recorded for every reject.
- **Governance and catalog:** Axon, EDC and CDGC: glossaries, lineage, ownership, policies, and classification aligned to NDMO standards.
- **Master data:** Informatica MDM match and merge rules, golden records and stewardship workflows.
- **Training and documentation** in English and Arabic, for technical teams and business owners.

TRACK RECORD

- **National data governance program, Saudi Arabia** (Renad Al Majd, Informatica partner): data management for Saudi government entities under NDMO standards: profiling and data quality rules, metadata, access control and data classification; Informatica and Power BI training; data management workshop at King Saud Medical City.
- Software engineering background (Python ERP development, HR systems) and a Bachelor of Computer Science, University of New Brunswick, Canada.

CERTIFICATIONS

- Informatica Cloud Data Quality Professional
- Informatica CDQ Implementation Practitioner
- Informatica CDGC implementation training

DELIVERY STANDARDS

- Expected counts and reject rules agreed in writing before the build.
- Every load reconciled: rows in = rows loaded + rows rejected, each reject with a reason.
- Restartable, rerunnable loads; an audit record per run; sensitive data masked before it leaves.
- Work packages under your brand and process; a handover note with every delivery.
